Centrobed

UK's leading manufacturer of Bespoke Specialist Beds

Paediatric

Centrobed's mission is to improve the quality of life for children and their parents.

MADE IN BRITAIN

Centrobed produce a range of quality, affordable and attractive paediatric beds, and cots. We can help find a solution to change lives. Paediatric care can be one of the most complex to assess. In many cases the child is unable to express themselves or their needs for comfort and mobility. Centrobed have a wide range of beds and cots designed to assist the child, parent and carer for day to day living.

Care planning and a needs assessment are vital so we can maximize the well being of the individual by using the correct equipment, from birth to adolescence. Prescribing the correct equipment is vital to assist in achieving the transition into adulthood.

Children with complex needs require a comfortable sleeping environment, whether this is on their own or sleeping with a parent or carer, their bed needs to support and profile in the correct places. Minimizing pain and maximising independence which ultimately can improve quality of life.

For individual assessments you can arrange a demonstration at home to assist in prescribing the correct equipment with the knowledge that your bed will be made in England by skilled engineers and craftsman.

10 Key considerations when buying a paediatric bed.

1. Comfort and support
2. Suitability
3. Bed Rail Safety
4. Profiling in the correct place
5. Will it accommodate complex needs: Turning - Feeding – Ventilator – Re-position
6. Moving and handling issues
7. Durability
8. Nursing needs of the child and parent
9. Night time postural support
10. Correct bed or cot to meet complex needs

Centrobed produce specially designed beds for children and young adults. Beds can be bespoke, made to fit the child taking into consideration each childs specific needs.

Colour: Colour of your choice

Accessories: Hoops, Auto Box, Sulu Step, Crash Mats

"Thank you so much for all your help in securing a Caribbean turning bed for our son, who has muscular dystrophy. Not only does it look fantastic (he loves the Star Wars theme!) it has literally transformed our lives.

Previously we were getting up multiple times during the night to reposition him, and that was severely impacting both his and our wellbeing. From the first time he slept in the Caribbean, he slept all night with no requests to be moved and has continued to do so. It has given him some independence back in terms of being able to manually reposition himself by using the handheld controls, as well as peace for us at night. We are able to pre-set the automatic turning function at bedtime."

Caribbean Turning Bed

Caribbean Turning Bed - that grows with your child

The Caribbean turning bed is a multi-positional versatile bed that can accommodate even the most complex needs. The Caribbean bed provides granular body movement and the ability to turn left or right whilst staying in the seated position, reducing the risk of pressure ulcers and paraesthesia. Height adjustable, the bed reduces unnecessary strain on carers backs.

The automatic turning function can be fitted and tailored for each individual's needs and can be programmed to turn at a frequency/pattern to suit, reducing the cost of night time care.

Movement Options 50 Degree Turn, Head Up, High/Low Trendelenburg, Knee Break, Left Leg Up, Right Leg Up, Turn Left, Turn Right

Key benefits:

- Ideal for care and community environments.
- Create a safe spacer for clients who are unable to cope with high surrounds around them.
- Easy access for personal care with the High/Low function,
- Suitable for children to young adults

Does not look like a hospital bed

Various finishes including solid colour and mesh

Mattresses
Centrobed offer a range of mattresses suitable for our beds.
Foam - Visco - Air Systems - Hybrid air system

Colour
Centrobed offer a wide range of colours choices.

Summer's Story

Summer is a nine-year-old girl living with Spina Bifida. Summer has had her Centrobed Quoddy Bed for 3 years. As with any little girl her age, Summer's interests and tastes have changed as she has grown .

Centrobed created new panels for Summer's bed to transform it from a Disney Princess bed to a Harry Potter theme!!

Both Summer and her parents were delighted with her new bed panels and the transformation achieved: "This bed has been absolutely amazing for our daughter. It gives her the independence to be able to transfer into and out of bed and to sit herself up without relying on us. It has also given us the ability to tend to her at a comfortable height without hurting our backs.

I'd also like to say that, from day one of viewing the beds, the team at Centrobed have been amazing. From sales to fitters and the aftercare team have all been amazing and we are happy to be part of the wonderful Centrobed family."

Carmela's Story

Carmela lives with LMNA-CMD which is a progressive muscle wasting disease, weakening every muscle.

Carmela and her family have completed a number of challenges including walking a kilometre a day for 30 days and a 100-day fitness challenge to share physiotherapy exercises and inspiration.

To mark the end of Carmela's 100-day fitness challenge, Centrobed were delighted to deliver Carmela a bespoke Caribbean Bed, complete with Wonder Woman theme!

"The bed does so many things to assist with sleeping. When you have Muscular Dystrophy sleeping can be very difficult. As I've got weaker I can't sit up in bed with ease, turning over is getting harder and I overheat at night. I normally rely on my mum at night when I need help, but my new Caribbean Bed from Centrobed has various settings to relieve my mum but also maintain some independence."

The Caribbean is a paediatric, fully profiling bed that turns, has independent leg movement, and will grow with the child.
